WEBSITE DEVELOPMENT QUOTATION

KE AQUA FARMS

Website Design & Development – Informational Business Website

1. PROJECT OVERVIEW

We propose to design and develop a professional, modern and fully responsive website for **KE Aqua Farms**.

The website will present KE Aqua Farms as an aquaculture-focused organization offering practical farming support, scientific monitoring, technology solutions, training and aquaculture-related services.

The website will primarily function as:

• Company / brand presentation

• Service showcase

• Farm and laboratory showcase

• Training and consultancy information

• Technology showcase

• Lead generation / enquiry collection

• WhatsApp and Email enquiry communication

• Contact and location information

The website will **not include ecommerce, online payments, customer accounts, CMS, admin dashboard or other complex application functionality**.

The website content and structure will be based on the requirements provided for KE Aqua Farms.

2. WEBSITE OBJECTIVES

Practical Farming + Scientific Monitoring + Technology + Training + Farmer Development

The website will position KE Aqua Farms as an aquaculture ecosystem rather than simply an aquaculture products dealership.

• KE Aqua Farms

• Kamatham Enterprises

• Aqua Pulse

• Farming Operations

• Farm Monitoring

• Laboratory Services

• Water Quality Testing

• Shrimp Health Analysis

• Microbiology / Vibrio Testing

• Farm Technology

• Practical Training

• Farm Visits

• Entrepreneurship Guidance

• Responsible Aquaculture

• Knowledge / Information

• Contact & Enquiries

3. SERVICES TO BE DISPLAYED

1. Aquaculture Farm Consultancy / Farm Support

Information about practical farm consultancy and support provided to farmers.

2. Farm Monitoring & Technical Support

Technical assistance and monitoring related to day-to-day farm operations.

3. Water Quality Testing

Water-quality testing and monitoring services based on the parameters currently available.

4. Microscopic / Shrimp Health Analysis

Microscopic observation and shrimp health assessment.

5. Microbiology / Vibrio Testing

Microbiological testing and relevant Vibrio monitoring according to actual laboratory capability.

6. Periodic Farm Monitoring

Regular farm visits, observations and monitoring support.

7. Seed Selection & Screening Support

Support related to seed observation, screening and stocking decisions.

8. Farm Technology Consulting

Consultation regarding practical technology adoption for aquaculture farms.

9. Auto Feeder Solutions

Information regarding auto-feeding solutions and their application in farm operations.

10. Aeration Management

Support related to aeration planning and management according to farm conditions.

11. IoT / Sensor-Based Monitoring

Information regarding sensor-based and technology-assisted farm monitoring.

12. Micro/Nano Bubble Technology

Information regarding micro/nano bubble technology and its practical applications.

13. Practical Aquaculture Training

Training programs for aspiring farmers, existing farmers, students, professionals and entrepreneurs.

14. Farm Visits / Exposure Programs

Farm exposure and practical learning opportunities.

15. Aquaculture Entrepreneurship Guidance

Guidance for individuals interested in entering or building businesses within the aquaculture value chain.

16. Aquaculture Inputs / Products through Kamatham Enterprises

Showcase of relevant aquaculture inputs and products offered through Kamatham Enterprises.

17. Other Services

A flexible section can be included for additional aquaculture services currently offered or introduced in the future.

4. PROPOSED WEBSITE STRUCTURE

HOME

• Hero section

• Main company message

• Introduction to KE Aqua Farms

• Key strengths

• Services overview

• Farming operations

• Aqua Pulse / laboratory overview

• Technology overview

• Training overview

• Farm process

• Responsible aquaculture

• Founder introduction

• Call-to-action sections

• Contact / enquiry section

ABOUT KE AQUA FARMS

• Company background

• Aquaculture journey

• Business philosophy

• Practical farming approach

• Scientific monitoring

• Technology adoption

• Farmer development

• Entrepreneurial approach

FARMING OPERATIONS

• Farm infrastructure

• Pond preparation

• Seed selection

• Stocking

• Feeding

• Auto feeding

• Aeration

• Water-quality management

• Animal health monitoring

• Biosecurity

• Harvest management

• Farm records

• Crop analysis

Actual farm photographs and videos supplied by the client will be used wherever available.

AQUA PULSE / LABORATORY

The laboratory section will showcase available scientific and testing services.

Water Quality Monitoring: pH, Alkalinity, Hardness, Ammonia, Nitrite / Nitrate, and other available parameters.

Microscopic Observation: Plankton observation, shrimp health observation, gut condition, hepatopancreas observation.

Microbiology: Relevant bacterial monitoring and Vibrio monitoring according to actual laboratory capability.

Periodic Farm Monitoring: Information regarding regular testing and farm monitoring.

Only tests and capabilities actually available at the laboratory will be published.

5. SMART AQUACULTURE TECHNOLOGY

• Auto Feeders

• Aeration Management

• Water Monitoring

• IoT / Sensors

• Micro/Nano Bubble Technology

Each technology will be presented from a practical perspective rather than as a simple product catalogue.

6. PRACTICAL AQUACULTURE TRAINING

Possible training programs include:

• 1-Day Farm Exposure

• 3-Day Practical Orientation

• 7-Day Foundation Program

• 1-Month Hands-On Program

• Full Crop-Cycle Learning Program

• Farm Visits / Exposure Programs

The website can also explain who can join, training philosophy, practical learning methodology, farm exposure, laboratory exposure, technology exposure and entrepreneurship guidance.

Training fees can be added later when finalized by the client.

7. AQUACULTURE ENTREPRENEURSHIP

• Hatchery

• Feed

• Farming

• Healthcare

• Laboratory

• Farm Technology

• Equipment

• Processing

• Cold Chain

• Marketing

• Retail

• Export

The purpose is to communicate that aquaculture entrepreneurship extends beyond simply owning a pond.

8. RESPONSIBLE AQUACULTURE

• Biosecurity

• Responsible input usage

• Antibiotic awareness

• Water management

• Food safety awareness

• Worker safety

• Environmental responsibility

• Scientific farmer awareness

• Women in aquaculture

9. FOUNDER SECTION

The website will include a professional founder profile for **Kamatham Emmanuel**.

• Professional background

• Aquaculture experience

• Farming experience

• Technical experience

• Training experience

• Entrepreneurship

• Founder philosophy

Professional photographs and final approved content will be provided by the client.

10. CONTACT / ENQUIRY FORM

A dedicated enquiry form will be implemented.

• Full Name

• Mobile Number

• WhatsApp Number

• Email

• Location

• Occupation

• I am a: Farmer / Student / Entrepreneur / Professional / Investor / Other

• Interested In: Farm Training / Laboratory / Farm Support / Technology / Business / Farm Visit / Other

• Message

Submit Enquiry
Once the visitor submits the form, the enquiry will be processed through the configured communication channels.

11. WHATSAPP ENQUIRY INTEGRATION

WhatsApp integration will be provided so that enquiries generated through the website can reach the client's designated WhatsApp number.

Proposed workflow

Visitor → Fills enquiry form → Clicks Submit Enquiry → Website processes the enquiry → Enquiry details are sent to the configured WhatsApp communication channel → Client receives the enquiry details

Example:
New Website Enquiry
Name: Rahul Kumar
Mobile: 9876543210
WhatsApp: 9876543210
Email: example@email.com
Location: Vijayawada
Occupation: Farmer
Interested In: Farm Support
Message: I would like to know about farm monitoring services.

12. WHATSAPP INTEGRATION CHARGES

WhatsApp Integration Development — ■3,000 – One-time

This includes:

• Website form integration

• WhatsApp configuration

• Enquiry data formatting

• Sending enquiry information through the configured WhatsApp solution

• Testing

• Basic troubleshooting during implementation

Important WhatsApp Cost Clarification

The above amount is the **website development/integration charge only**.

Any third-party or official WhatsApp platform charges, Meta WhatsApp Business Platform charges, Business Solution Provider charges, messaging/conversation charges or other applicable WhatsApp service charges are **not included** in the website development cost.

These charges, if applicable, will be billed separately by the respective WhatsApp/Meta service provider.

The exact WhatsApp recurring/messaging cost depends on the method selected for the client's WhatsApp setup and the applicable provider pricing.

The client will be responsible for providing/owning the required WhatsApp Business account, phone number and any required verification.

13. EMAIL ENQUIRY INTEGRATION

Website enquiries will also be configured to reach the client's designated email address.

Whenever a visitor submits the enquiry form, the client can receive an email containing the submitted information.

Example: New Website Enquiry – KE Aqua Farms

• Name

• Mobile

• WhatsApp

• Email

• Location

• Occupation

• Service interested in

• Message

• Date/time of enquiry

Email Integration — Included in website development.

No separate development charge will be applied for basic enquiry email functionality.

Any paid email service, SMTP provider, business email subscription or third-party email service, if required, will be charged separately.

14. WHATSAPP + EMAIL ENQUIRY FLOW

Website Visitor → Selects a Service → Fills Enquiry Form → Clicks Submit → Form Validation → Enquiry Sent to Client Email + Enquiry Sent Through Configured WhatsApp Solution → Client Contacts the Customer Directly

This removes the requirement for an admin panel or CMS for managing enquiries.

15. NO ADMIN PANEL / CMS

A CMS or administrative dashboard is **not included or required** for the current requirement.

The client does not need to log into a separate dashboard to view enquiries. Instead, enquiries will be delivered directly through the configured communication channels.

If the client requires a CMS/admin panel in the future, it can be developed as a separate enhancement.

16. NO ONLINE PAYMENT SYSTEM

• Payment gateway

• Online checkout

• Shopping cart

• Product purchasing system

• Subscription system

• Customer wallet

• Order management

• Invoice generation

The website will primarily be an informational and enquiry-generation platform.

17. NO CUSTOMER LOGIN

• Customer registration

• Customer login

• User dashboard

• Password management

• Member accounts

These features are not required for the current scope.

18. RESPONSIVE DESIGN

The website will be fully responsive and optimized for:

• Desktop

• Laptop

• Tablet

• Mobile phones

The layout, typography, images, navigation and enquiry forms will be adapted for different screen sizes.

19. DESIGN DIRECTION

Modern + Scientific + Agricultural + Premium + Clean

The website will prioritize:

• Real farm photography

• Professional typography

• Clean layouts

• Strong visual hierarchy

• Professional colour system

• Easy navigation

• Mobile responsiveness

• Clear service presentation

• Strong enquiry call-to-actions

The website will avoid excessive:

• Animations

• Colours

• Pop-ups

• Gradients

• Crowded layouts

• Generic stock photography

Actual farm, laboratory, training and technology photographs supplied by the client will be preferred.

20. BASIC SEO SETUP

• Page titles

• Meta descriptions

• Proper heading structure

• Image alt text

• SEO-friendly URLs

• Mobile-friendly structure

• Basic search-engine-friendly page structure

This is basic website SEO implementation and does not include an ongoing SEO campaign.

21. GOOGLE MAPS

Google Maps location integration will be included on the contact section/page.

The client will need to provide the correct business location/address or Google Maps location.

22. SOCIAL / CONTACT LINKS

• WhatsApp

• Email

• Phone

• YouTube

• Instagram

• Facebook

• Other official social media profiles

The client will provide the relevant account links/details.

23. CONTENT & MEDIA

The website will use the content supplied and approved by the client.

The client is expected to provide:

• Logo

• Brand assets

• Company information

• Founder information

• Farm photographs

• Farm videos

• Laboratory photographs

• Technology photographs/videos

• Training photographs

• Contact information

• Service information

• Social media links

• Google Maps location

• Applicable certifications/documents where required

Content will be arranged and presented professionally within the website.

24. DOMAIN & HOSTING

Domain and hosting are separate from website development unless specifically mentioned in the final commercial agreement.

If the client already has a domain and hosting account, the website can be deployed using those services.

If new domain/hosting is required, the applicable registration and hosting charges will be paid separately by the client.

25. SECURITY & FORM PROTECTION

• Form validation

• Basic spam protection

• Secure handling of form submissions

• HTTPS/SSL configuration where supported by hosting

• Basic protection against invalid form submissions

Advanced cybersecurity/security auditing is not included in the current scope.

26. WEBSITE PERFORMANCE

• Responsive loading

• Optimized images

• Efficient frontend structure

• Mobile usability

• Basic performance optimization

Very large videos or unoptimized media supplied by the client may require separate media compression/optimization.

27. TESTING

• Desktop responsiveness

• Mobile responsiveness

• Navigation

• Contact forms

• Email enquiry delivery

• WhatsApp integration

• Google Maps

• Buttons and links

• Basic browser compatibility

• Form validation

28. ESTIMATED DEVELOPMENT TIME

7–10 Working Days

The duration covers the agreed website design, development, integration, testing and deployment activities.

The actual delivery timeline may depend on the timely availability of content, images, videos, logos, contact details, WhatsApp details, email details, hosting/domain access where required, and client feedback and approvals.

29. PROJECT COST

Particular	Amount
Website UI/UX Design	■6,000
Responsive Website Development	■10,500
Website Pages & Service Sections	■4,000

Particular	Amount
Contact / Enquiry Form	■1,500
Email Enquiry Integration	Included
WhatsApp Enquiry Integration	■3,000
Google Maps Integration	Included
Basic SEO Setup	Included
Responsive Optimization	Included
Testing & Deployment	Included
TOTAL WEBSITE DEVELOPMENT COST	**■25,000**

Total Project Cost: ■25,000

30. WHAT IS INCLUDED IN ■25,000

• Professional responsive website

• Home page

• About section

• Farming operations section

• Aqua Pulse / laboratory section

• Services section

• Technology section

• Training section

• Entrepreneurship section

• Responsible aquaculture section

• Founder section

• Contact section

• Enquiry form

• Email enquiry integration

• WhatsApp enquiry integration

• Google Maps

• Basic SEO

• Mobile responsiveness

• Basic form security

• Website testing

• Website deployment

31. WHAT IS NOT INCLUDED

• Ecommerce functionality

• Online payment gateway

• Shopping cart

• Customer login

• Customer dashboard

• Admin panel

• CMS

• Online booking/payment system

• CRM

• Advanced lead management

• Advanced analytics/dashboard

• Custom mobile application

• Advanced SEO campaigns

• Paid advertising

• Social media management

• Professional photography

• Professional videography

• Logo/brand identity redesign

• Paid third-party APIs

• Paid WhatsApp/Meta messaging charges

• Paid email/SMTP services

• Domain registration

• Hosting charges

• Premium stock images/videos

• Third-party software subscriptions

Any additional functionality outside the agreed scope can be quoted separately.

32. WHATSAPP COST – IMPORTANT NOTE FOR CLIENT

The website development quotation includes the technical integration required to connect website enquiries with the client's WhatsApp communication setup.

However, WhatsApp/Meta may have separate charges depending on the selected WhatsApp Business Platform/API setup and messaging method.

Website WhatsApp Integration: ■3,000 one-time

WhatsApp/Meta/Third-Party Messaging Charges: Not included and payable separately if applicable.

This distinction is important because WhatsApp platform costs are external service charges and are not controlled by the website development team.

33. FUTURE UPGRADES

• CMS

• Admin dashboard

• Lead management

• Customer database

• Online training registration

• Online payments

• Ecommerce

• Product catalogue

• Booking system

• CRM integration

• Advanced analytics

• Automated WhatsApp notifications

• Automated email campaigns

• Knowledge management system

• Farmer portal

• Customer login

• Mobile application

These are not part of the current quotation.

34. CLIENT RESPONSIBILITIES

• Final company information

• Final service information

• Logo and branding material

• Approved photographs

• Founder information

• Contact information

• WhatsApp number

• Email address

• Google Maps location

• Social media links

• Laboratory/test information

• Any required legal/certification information

The client will also be responsible for reviewing and approving the final website content.

35. CONTENT ACCURACY

All technical, laboratory, certification, registration, farming-performance and business claims displayed on the website should be verified and approved by the client before publication.

The website will not make unsupported claims such as:

• Guaranteed profits

• Guaranteed disease prevention

• Guaranteed crop success

• Risk-free investment

• Guaranteed production

Only genuine and client-approved information will be published.

36. FINAL DELIVERABLE

At completion, the client will receive a professionally designed and responsive KE Aqua Farms website focused on:

Farming + Science + Technology + Training + Farmer Development

The website will provide visitors with clear information about the organization's services and allow interested farmers, students, entrepreneurs, professionals and other visitors to directly contact the team through the configured enquiry channels.

COMMERCIAL. SUMMARY
